SUMMARY

Analytics engineer and field operations professional who has been on both sides of the problem. Architected data pipelines and built BI systems from the ground up. Currently working field sales in home services in Northeast Florida, with direct visibility into how dispatch, scheduling, and customer conversion actually work at the branch level. Focused on a seat where technical depth and operational context combine to drive AI products that frontline teams actually adopt and that deliver measurable business outcomes.

CORE COMPETENCIES

AI and Analytics: Machine Learning, NLP, Predictive Modeling, Pipeline Architecture, SQL, Python, ETL/ELT, Feature Engineering, KPI Framework Design, A/B Testing, Experiment Design
Product and Program: Business Case Development, Roadmap Ownership, Stakeholder Alignment, Cross-functional Leadership, Vendor and Partner Management, Agile and PMO Environments
Field Operations: Dispatch and Scheduling Context, Customer Conversion, Frontline Team Dynamics, Change Management, Adoption and Training, Branch-level P&L Awareness
Infrastructure: AWS, Azure, GCP, Power BI, Tableau, Microsoft Fabric (familiarity), High-Availability Systems, Data Governance

EXPERIENCE

HD Sales Associate

ARS Rescue Rooter (Florida Home Air Conditioning) | May 2026 – Present | Northeast Florida

- Operating inside a retail lead generation program, with direct daily exposure to the customer acquisition funnel, appointment scheduling workflow, and dispatch handoff process that AI-driven optimization products are designed to improve.
- Observed firsthand where scheduling friction, conversion drop-off, and dispatch sequencing create operational inefficiency at the branch level, providing the ground-truth context that most teams building software for field service never have.
- Consistently hit performance targets in a commission-driven environment through disciplined activity management and customer-focused engagement.

Retail Brand Ambassador

Renuity Home | November 2025 – April 2026 | Northeast Florida

- Achieved S-Tier status, the highest internal performance designation, in a multi-location home improvement sales operation.
- Developed deep understanding of homeowner decision journeys, in-home consultation conversion, and the operational handoffs between marketing, sales, and field delivery.

Founder and Data Engineer

Root Labs | February 2023 – September 2025 | Nashville, TN

- Owned product strategy and business case end-to-end for a financial data pipeline platform: defined success metrics, managed build-vs-buy decisions, led a team of 4 through architecture, development, and deployment.
- Architected an API ingestion pipeline that cut third-party data costs by 80%, replacing recurring vendor spend with internal data control.
- Translated complex operational data problems into engineering requirements, managed stakeholder alignment across technical and non-technical audiences, and tracked outcomes against agreed baselines.

Data Analyst

AE Global Solutions Inc. (DBA Socrates Platform) | February 2018 – November 2021 | St. Petersburg, FL

- Maintained 99% uptime across 24/7 financial data operations processing 200GB+ daily, with full responsibility for data governance, pipeline integrity, and stakeholder reporting.
- Expanded data product offerings by 120% through S&P and Reuters partnerships, owning the business case and cross-functional coordination for each integration.

EDUCATION

M.S. Business Analytics | University of Colorado Boulder, Leeds School of Business | ML/AI, NLP, Deep Learning, Statistical Methods, Cloud Computing, Data Warehouses

M.B.A. | Middle Tennessee State University | Business Strategy, P&L Management, Cross-functional Leadership
